

## The Exclusive Steam Cured Epoxy Liner with a 60-Day Open Time!

### Now You Can Line Laterals Without Needing to Wet-Out!

Our DURAPOX steam-cured epoxy liner can sit 60 DAYS without curing, so we can ship you pre-impregnated liners ready for installation!

The green DURAPOX liner cures in 90 minutes!

Finished liner can sit 60 days without curing!

The FORMADRAIN Lateral Lining and Spot Repair System has been in Constant Use since 1994!

✓ **DURAPOX is an exclusive product available nowhere else.** It is a pre-impregnated FORMADRAIN liner that can sit in the open for 60 days, in a garage—or the floor of a warehouse!

✓ **READY TO GO:** The liner gets prepared in our shop and then shipped out to the installer.

✓ **SIMPLE TO DEPLOY:** All they need do is clean the line, insert the new liner, and steam cure 90 minutes. The entire job can take a couple of hours from when you arrive on site!

The installer can purchase DURAPOX and prepare job in advance on their end, including at an offsite location.

✓ **PLUS:** With this technology, an installer doesn't need a 60-foot table or large space to prep liners, they can just order them from FORMADRAIN if they wish! Additionally, this saves 1 to 2 hours on liner preparation — saving time and money!

Also, for large jobs requiring multiple liners, you can prepare them all in advance and then deploy one after the other — regardless of how long it takes!

*"We can re-line through a 4-inch cast iron clean out, a Y in a 45 and go right to the city main with ZERO digging... We can do the 4 to 6 transitions without measuring... The fiberglass epoxy just opens up beautifully and you get a nice, seamless transition. Also the support we get is second to none. You can call any time, day or night..."*

Jim Levine,  
Formadrain installer since 2004

# Durapox®

## No more wet-outs needed with DURAPOX®!

**In 1994:** NAFTA became fact, Mandela became South Africa's president, and Formadrain launched the world's first steam cured epoxy lining system.

### Formadrain's quick and reliable steam cured epoxy lining solution puts an end to unpredictable ambient cure systems.

Formadrain licensees agree: They like the steam. "It's quick and it's done with. You don't have to wait there after. You cook it, we remove the hoses, we pull the bladder out and we're done."

- 1. IT'S VIRTUALLY INDESTRUCTIBLE**  
cures 5X stronger than industry standards!
- 2. THERE'S NO FELT TUBES**  
We use epoxy and woven fiberglass!
- 3. THERE'S NO MEASURING**  
for transitions!
- 4. THERE'S 100% NO DIGGING**  
We use existing cleanout. Always!
- 5. It's pulled or pushed into place, so you can place the epoxy liner exactly where you want it. Perfect for spot repairs!**
- 6. LINING T'S, Y'S AND OFFSET JOINTS:**  
Ts, Ys and offset joints are no problem and it also does effortless transitions...
- 7. INCREDIBLE STRENGTH:**  
The woven fiberglass and steam-cured epoxy is very strong, predicted to last more than 50 years!

DURAPOX® liner ready for installation  
10 feet long by 10 inches in diameter

*"We did a lot of research prior to purchasing a lining system... I honestly believe it's the best product on the market."*

Mike Kolakovic  
Years long Licensee
